SUMMARY

A Web developer enthusiast who has shipped production React and Next.js applications, including a live company website redesign. Focused on accessible, performant UI and close collaboration with backend teams. My strong suits are Web and Python development in both industry and academia.

WORK EXPERIENCE

LASCAUX DESIGNS | FRONT END DEVELOPER

2024 – 2025 | Remote

- Led the front-end rebuild of the company's e-commerce platform with React and Next.js, improving accessibility through WCAG 2.1 AA compliance and responsive UI development
- Collaborated with developers to implement 20+ reusable UI components and design improvements, ensuring consistent branding, responsive layouts, and improved usability across desktop and mobile devices.
- Optimized performance for 30+ product and category pages through image lazy-loading and JavaScript optimization.
- Resolved UI bugs and compatibility issues, improving application stability and user experience across modern browsers.

FREELANCING | WEB DEVELOPER

2022 – 2023 | Kota, Raj.

- Converted a client-provided Figma design into a fully responsive website, replacing a previous version the client described as cluttered.
- Delivered a 5-step interactive onboarding tour with a synced carousel component, guiding new visitors through the product's core features.
- Designed a dynamic modal system to preview 9 distinct product features in-place, without page navigation.

PROJECTS

FITNESS APP (FITNESS LABS)

<https://github.com/KapilCS15/fitness-lab> | LIVE

- Built a workout-planning web app generating customizable training plans by fitness goal (strength, hypertrophy, etc.) with progress tracking.

CHAPTER & VERSE — ASYNC BOOK & MOVIE CLUB TRACKER

<https://github.com/KapilCS15/Chapter-and-verse> | LIVE

- Constructed a full-stack Django/DRF application enabling reading and watching groups to vote on content via ranked-choice voting and discuss it asynchronously without spoilers.
- Designed a progress-based content-gating system so members only see discussion for the chapters or episodes they've actually reached.

THE CINEPHILE — MOVIE DISCOVERY APP

<https://github.com/KapilCS15/movie-app> | LIVE

- Developed a movie and TV discovery app integrating the TMDB API for plot summaries, ratings, release dates, and trailers.
- Implemented a watchlist/favorites feature, letting users save and revisit titles they're interested in.

SKILLS

PROGRAMMING

• Python • JavaScript • HTML5
• CSS3 • C++ • C • SQL

LIBRARIES/Frameworks

• React JS • Redux • Bootstrap
• Tailwind CSS • Django

OTHERS

• Object-Oriented Programming
• Git / GitHub • Data Structures
• REST APIs

TOOLS

• VS Code • PyCharm
• Netbeans • Figma

EDUCATION

BACHELOR OF - TECHNOLOGY

COMPUTER SCIENCE

Modi Institute of Technology, Kota, Raj.
(2018 - 2022)

XII STANDARD

PCM

Private Candidate, Kota, Raj.
(2018)

ACHIEVEMENTS

- Published an article breaking down the tradeoffs of implementing ranked-choice voting for group content selection in Django.
 - [Article link](#)
- Completed a Data Structures & Algorithms program in Python by Preplnsta, covering core DSA topics, culminating in a final assessment.
 - [Certificate link](#)
- Programmed an Arduino-controlled RC car during an IIT Bombay robotics workshop in college campus.
